## Eco-Friendly & Degradable

02

## Recycle & Biodegradable

We have been dedicated to own designed patterns lately with our well-chosen GRS certified suppliers, and proud to present more unique mélange or heather effect recycled fabrics in different price range. Also introducing a more upgraded version with special characteristic wherein fibers can be decomposed in certain period of time, the brand new Biodegradable fabrics.

## Recycle

We included Biodegradable, Anti-bacterial, and FR Free fabrics to development, as recycled is now a market trend and most clients were looking for more additional functions

## 302FR Free

Chemical Free fire retardant fabric is definitely a must for US market, and we can conduct FR test in-house at our own factory in Shenzhen, China.

## Antibacteria

Antibacterial is an important factor during this COVID-19 pandemic, and we ensure fabric performance passing AATCC100 (AATCC6538/AATCC4352).

## Naia

(Eastman) Naia™ fiber is a brand new cellulosic yarn made from renewable wood pulp with supremely smooth hand feel and good wicking effect.

## Seawool

Oyster shell presents a major disposal problem in coastal regions, but now they are ground into powder, mixed with recycled plastic bottles, and turned into fibers. It helps keep body warm in cold temperatures and comes with a great comfortable hand feel, wicking property.

## Tencel

TENCEL™ branded lyocell and modal fibers are produced by environmentally responsible processes, from the sustainably sourced natural raw material wood. Quality is extremely smooth and soft with excellent drape, doesn't wrinkle easily, and holds dye well so it makes vibrant colors. It's also breathable and manages moisture so it helps with temperature regulation. These features make it particularly popular for baby product manufacturing.
